- General purpose fall arrest lanyard suitable for fall arrest, work positioning and restraint
- Includes double action snap hook for attachment to harness fall arrest point
- End connector consists of double action snap hook for easy connection to anchorage point
- Shock absorber unit encased in UV resistant transparent plastic for easy inspection
- Impact fall force on user kept below 6kN
- Overall length of 2.0m
- Meets or exceeds all applicable industry standards

Every DBI-SALA lanyard combines super strength and ease of use without sacrificing safety. All lanyard hardware is proof tested to meet or exceed industry standards before you even get it.

DBI-SALA's range of fall arrest rated shock absorbing lanyards are designed to quickly and effectively arrest a fall, whilst minimising shock loads on the body. The key to DBI-SALA's lanyards is the ZORBA® (shock absorbing unit) that utilises a controlled tearing action when subjected to a fall, limiting the arresting forces to under 6kN. The Zorba® unit features a transparent casing designed to make visual inspection easier for the user.

DBI-SALA lanyards are manufactured in a wide range to suit your specific needs and applications. They are available in either single or double tail configurations constructed from webbing (elasticated, non elasticated, tie-back and adjustable), wire or rope; with a combination of hooks and karabiners.
